Results

- Through the energy audits and monitoring, Edge Insights identified refunds and significant monthly savings for Wayne HealthCare.
- Much of the current savings will be achieved from shopping and managing Wayne HealthCare's natural gas and electricity usage moving forward.
- Wayne HealthCare anticipates a 19% savings in energy costs over the next year.

Wayne HealthCare Anticipates a 19% Savings in Energy Expenses Over the Next Year

The Client

Located in Greenville, Ohio, Wayne HealthCare has been caring for the community it serves for over 100 years. Consisting of a full-service, regional primary care facility and four satellite locations throughout Darke County, Wayne HealthCare is staffed by more than 125 physicians, experienced nurses, clinicians and 400 support staff.

The Challenge

As a member of Amerinet (a National healthcare GPO—Group Purchasing Organization), Wayne HealthCare came to Edge Insights through their mutual relationship with the organization. With several locations, Wayne HealthCare approached Edge Insights to analyze and audit their natural gas and electricity usage.

The Benefits

Upon discussion and further research, Wayne HealthCare was confident Edge Insights' industry experts would effectively ensure accuracies in the energy usage throughout their locations. Further, they knew that there was no-risk and no-fee to engage Edge Insights in this capacity. Because of their Choice Partner relationship with Amerinet, Wayne HealthCare was secure in knowing that they would be receiving the very best service from Edge Insights.

"Edge Insights has exceeded our expectations at Wayne HealthCare. As an Amerinet Choice partner, we knew that Edge Insights would help us reduce costs without sacrificing quality. Their team of industry experts executed the energy audit on a timely basis and continues to monitor our contracts each month for accuracy. The best part about this relationship is that the savings we realize can be used for patient care, which is always our primary concern."

Jeff Subler, Director of Plant Services—Wayne HealthCare
